

A bird table or a bird bath will attract lots of different species who, once they know that food or water is available will return regularly. Hang up feeders and fill them with peanuts or specialist bird food.

There are many places to obtain advice on wildlife gardening, your local library, the web, your local wildlife club. A good start for birds is the R.S.P.B, [www.rspb.org.uk](http://www.rspb.org.uk).

For other wildlife try the Wildlife Trust. Most important of all, relax, do not get hung up about it, anything you do is a help. Do something, sit back and enjoy the show.
